About Me

My name is Supakorn. Website creation are the foundation of computer engineering activities. Therefore, I have a variety of skills enough to design and create websites. I like to learn new knowledge and solve various problems.

Experience

Design Website Comcamp 33 ,KMUTT

MARCH 2022 - APRIL 2022

At my first university event, I collaborated with new Student to design a website. This is where I started web design, where I gained valuable insights into website design and structure. Through teamwork, not only can practical knowledge be acquired, but also the ability to work efficiently in a collaborative environment can be improved.

Design Website Pre-Freshy 2022 ,KMUTT

JUNE 2022 - JULY 2022

In the prefreshy2022 job camp, I workhard to improve my website functional design skills to better understand the people who use it. This experience refined my web design development skills and helped increase my appetite for education in design.

Develop Web app Event by ticket ,KMUTT

MAY 2023 - JULY 2023

The "Evento" Ticket System Web Application project was created as a project in the CPE241 subject. In this project, I used Typescript and Next.js to write data on the front-end and retrieve data on the back-end via Postman-API. The web page of the app has an intuitive interface. User-friendly interface that allows users to browse activities View event details, choose your seat, and purchase tickets.

Develop Project Software Fridering ,KMUTT

SEPTEMBER 2023 - NOVEMBER 2023

Fridgering is a software that helps you create recipes from the ingredients in your fridge. It also helps you find recipes if you have an idea for a dish but don't know what ingredients to add. I design UX/UI, front-end, and linked API. In this project my team use agile process to plan and develop this software.

Education

King Mongkut's University of Technology Thonburi

3rd year bachelor's degree, AUGUST 2021 - PRESENT
